

## Read this **FIRST** Files for Digital & Social Media

The images in this file are 96 dpi jpg images and are suitable for any use in digital format including social media or for you to put into online newsletters, web updates, however, you want to use them.

There are two sizes included—one for Instagram posts and the second for Facebook posts. You can resize them for whatever other digital applications you want to use them for.

Remember at 96 dpi, these are LOW-resolution images. You don't want to use them for printed materials or to send them to a company to reproduce at a larger size and frame. The other images in this set are all high resolution either 300 dpi or PDFs. Be sure to use those for print applications.
